Summary

Data Science graduate proficient in Python, SQL, ETL, Machine Learning, Power BI, and Excel with hands-on experience building end-to-end data solutions. Developed impactful projects including a Heart Disease Prediction system and a Sales Data Analytics pipeline, showcasing strong analytical and problem-solving abilities. GATE DA 2025 Qualified and Smart India Hackathon 2024 Finalist, eager to deliver data-driven insights in a dynamic enterprise environment.

Technical Skills

Programming & Querying: Python, SQL

Data Analysis: Pandas, NumPy, Scikit-Learn, Statistical Analysis, Feature Engineering, Data Cleaning

Visualization & BI: Power BI, Tableau, Matplotlib

Databases & Cloud: MySQL, MongoDB, Amazon S3

Tools & Frameworks: Git, GitHub, Flask, Google Gemini (GenAI SDK), REST APIs

Experience

AI/ML Intern

May 2025 – Jun 2025

SkillDzire (Remote)

Python, Machine Learning, Deep Learning, TensorFlow

- Developed and deployed ML and Deep Learning models for real-world prediction applications using Python, Scikit-Learn, and TensorFlow.
- Performed end-to-end data preprocessing, feature engineering, and model evaluation to improve prediction accuracy across classification tasks.
- Communicated model insights through diagnostic visualizations (ROC-AUC, Precision/Recall, Confusion Matrix) for technical and non-technical audiences.

Projects

Heart Disease Predictor | *Python · Scikit-Learn · Random Forest · Streamlit*

- Built and deployed a Streamlit web app predicting heart disease likelihood using a trained Random Forest classification model.
- Implemented end-to-end ML pipeline covering data preprocessing, feature engineering, model training, and serialization via `model.pkl`.
- Achieved **85%+ model accuracy** using cross-validation, hyperparameter tuning, and ROC-AUC evaluation metrics.

Sales Data Pipeline — ETL & Analytics | *Python · Pandas · SQLite · SQL · Matplotlib*

- Designed an end-to-end ETL pipeline to extract, clean, and load global sales data into a structured SQLite database for analysis.
- Performed data transformation including column standardization, duplicate removal, date parsing, and feature engineering.
- Executed SQL queries to generate regional profitability and sales performance insights; visualized trends using Matplotlib.

EduSphere — Enterprise College Management System | *Python · Flask · MySQL · Google Gemini*

- Built a full-stack web app with Role-Based Access Control (RBAC) serving distinct dashboards for Students, Faculty, and Administrators.
- Integrated Google Gemini 2.5 Flash as an AI subsystem for academic query resolution with an offline fallback for high availability.
- Developed a responsive UI using HTML5, CSS3, and JavaScript with dynamic REST API integration and real-time theme toggles.

Achievements

- **GATE DA 2025 Qualified** – Nationally competitive exam validating Data Science and Analytics fundamentals.
- **Smart India Hackathon 2024 Finalist** – National-level innovation competition.
- **GOLD Certification** – NPTEL Internet of Things (IoT).
- **Deloitte Data Analytics Job Simulation** – Virtual internship on data analytics workflows and insights.

Education

B.Tech – Computer Science (Data Science)

2022 – 2026

Mother Theresa Institute of Engineering and Technology, Palamaner, JNTUA

CGPA: 8.6 / 10
